

Carbon Reduction Plan

Supplier name: Revival Health UK Limited

Publication date: 31/07/2023

Commitment to achieving Net Zero

Revival Health UK Limited is committed to achieving Net Zero emissions by 2030.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2023	
Additional Details relating to the Baseline Emissions calculations.	
This represents the initial first report on emissions from supplier. Distributed and virtual working structure for the supplier confirms a low carbon foot print from the local UK entity. Supplier benefits from establishing low carbon operating environment and intends to maintain such measures for any future expansion.	
Baseline year emissions: 2023	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	0
Scope 2	0
Scope 3 (Included Sources)	1.12
Total Emissions	1.12

Current Emissions Reporting

Reporting Year: 2023 (same as Baseline)	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0
Scope 2	0
Scope 3 (Included Sources)	1.12 (see table below for details)
Total Emissions	1.12

	Description	Metric tons of CO ₂ e
Scope 1	Office emissions (gas)	0.0
	Other Scope 1 emissions	0.0
Scope 2	Office emissions (electricity)	0.0
Scope 3	Homeworker electricity emissions (home office)	0.1
	Homeworker electricity emissions (air-conditioning)	0.0
	Homeworker gas emissions	0.0
	Diesel emissions (commute)	0.0
	Petrol emissions (commute)	0.0
	Hybrid emissions (commute)	0.0
	Motorbike emissions (commute)	0.0
	Train emissions (commute)	0.0
	Bus emissions (commute)	0.0
	Taxi emissions (commute)	0.0
	Train emissions (in work travel)	0.1
	Diesel emissions (in work travel)	0.0
	Petrol emissions (in work travel)	0.1
	Hybrid emissions (in work travel)	0.0
	Bus emissions (in work travel)	0.0
	Taxi emissions (in work travel)	0.0
	Plane emissions	0.0
	Hotel emissions	0.3
	Additional estimates for purchases of goods and services	0.5
	Other Scope 3 emissions	0.0
Total emissions	Company CO ₂ Emissions (tons)	1.12
	Average CO ₂ Emissions per person (tons)	0.281
	Average CO ₂ Emissions per person per day (kgs)	1.21
	Equivalent airmiles travelled	3,837
	Trees required to offset	17

Total Scope Breakdown

Scope	Total metric tons of CO ₂ e
Scope 1	0.0
Scope 2	0.0
Scope 3	1.1

Emissions reduction targets

The Supplier baseline is already at or close to net zero carbon emissions. As per our ongoing carbon reduction project plan, we intend to maintain low carbon intensity within our working practises and where necessary to purchase verified carbon offset certificates to meet a net zero outcome.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

Supplier baseline provides for a very low carbon emission footprint, equivalent to net zero within the standard error of calculations. Emissions from the supplier are significantly optimised at baseline.

The Supplier intends to maintain a low carbon footprint from ongoing working structure, including selecting rail and electric vehicle for essential business travel.

In the event Scope 1 to 3 emissions exceed 50 tCO₂ equivalent in future years, the Supplier commits to offset emissions with verified carbon emission credits and to report the register and project from which credits are purchased.

Whilst it is not envisioned that Scope 1 to 3 emissions will exceed 100 tCO₂ equivalent within the medium-term 2 year business plan, in the event internal calculations do indicate such emission level are likely to be breached, the Supplier commits to employ ISO 14064-1:3 to ensure best practise in quantifying and reporting emissions and reduction plans.

In the future we hope to implement further measures such as ensuring virtual working conditions, restrictions on carbon intensive travel and efficient local UK operations.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard⁴ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting⁵.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in

⁴<https://ghgprotocol.org/corporate-standard>

⁵<https://www.gov.uk/government/collections/government-conversion-factors-for-company-reporting>

accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard⁶.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

A handwritten signature in black ink, appearing to be 'RAM', written over a horizontal dotted line.

Date: August 1, 2023
