

Mobilisation and Start Up of Healthcare Facilities

Capability Statement

September 2023

We are a specialist organisation for mobilisation and start up of all types of healthcare facilities, from small outpatient clinics through to diagnostic centres and mega hospitals. With our unparalleled commercial, technical and operational expertise, coupled with an acclaimed record of success in delivery of high-quality facilities, we can advise engaged or lead any stage of the development life cycle of the facility.

Our approach is to complement, enhance and develop our clients' resources, skills and expertise in all or any of the following areas:

- Review of feasibility studies and financial models including validated demand and financial viabilities.
- Development, validation and enhancement of realistic business plans.
- Review and enhancement of the design of healthcare facilities in association with the leading multidisciplinary healthcare architectural and engineering organisations.
- Development, management and assurance of the entire delivery programme.
- Design and implementation of clinical, operational and commercial services compliant to the highest quality and operational standards of the NHS, CQC, UKAS and ISO.
- Management of registration and regulatory licencing processes.
- Oversight of staff recruitment, training and mobilisation.
- Procurement, implementation and management of fit for purpose Healthcare IT and medical equipment.
- Post go-live support and monitoring and assurance on successful implementation of the business plan.

Our Credentials and recent work include:

- Circle Birmingham Hospital
- Indo UK Clinics
- Circle Reading Hospital
- Cambridge Forum
- Circle Bath Hospital
- Cambridge University Hospitals NHS Foundation Trust
- Circle Nottingham Treatment Centres
- Queen Elizabeth Hospital NHS Foundation Trust
- King Edward VII's and St John & St Elizabeth Hospitals
